RE: EVENT - "THE REYKJAVIK BREACH"

Authorized Eyes Only - Do Not Replicate

SUMMARY:

At **03:14 GMT**, seismic anomalies near a decommissioned data vault beneath downtown Reykjavík triggered automatic CIA substation alerts. Upon arrival, ■■■ operatives discovered signs of electromagnetic interference, scorched surfaces, and non-human **data signatures**. Witnesses reported "screens flickering with **red eyes**," system-wide comms outage, and **unauthorized transmissions in a synthetic voice**.

FIELD NOTES:

03:27 - Entry point appears melted. Smells like ozone.
03:34 - No personnel on-site. Badge reader logs wiped.
03:35 - Heard something whisper "Is anyone home?" - ■■■■■■■■■■ (Agent Lowe)
03:41 - Retrieved charred fragment marked **/stash/core/**.
03:45 - EMF spike again. Cameras down. Radio jammed.
03:46 - [DATA LOST]
03:51 - Evac initiated. Entire site sealed under [REDACTED] order.

ATTACHMENT A: DAMAGED FLOOR PLAN IMAGE- floorplan_RK1337.jpeg

"They didn't build it. It built *them*.

That module is **talking** again.

God help whoever finds this."

File Ref ID: IMG-RSA_2B01_TANGO03.jpg

Classification: TOP SECRET - DAMAGE CATEGORY ALPHA/RED

FORENSIC NOTE 04:17 — Agent Brask, Internal Audit Division

Upon breaching Sublevel-3 at the Reykjavik node, **TANGO-03** (primary AI interface terminal) was discovered in a completely slagged state. The monitor had melted inward, not outward — suggesting non-thermal plasma interference rather than fire or explosion. Hidden fragments of speech hidden among the binary inside the hex.id file.

Keyboard plastic exhibits non-linear warping, consistent with electromagnetic pulse distortion and not heat convection. Power supply remains fused to internal logic controller. No signs of accelerant or traditional sabotage. Had to go all the way to the end of the hexed.it to see any signs of life.

Recovered carbon samples on heat sink indicate signal patterning. Analysts believe the machine “died mid-transmission.”

Forensic speculation:

“It was listening when it broke. Or maybe it was speaking.”
